# THE BYNG POST

by Ashton and Lila editors Nathan.

New students at Byng in Nov and Dec - please welcome to our school  
Sahara, Illiana, Addison, Anastasia, and India

THIS MONTH SCIENCE FACT IS

CANADA IS 9.985 MILLION KM LONG

THIS MONTH'S COMIC IS:

## **THIS MONTH'S INTERESTING STORY**

Back in the 1930's Byng was a High School and an Elementary School. The High School classes were on the top floor and the Elementary classes were on the bottom floor. The gym was in the basement! The pods and the gym that we have today, were not there. It was just the old brick school.

The Stayner Arena used to be where our Intermediates field is today. Students would go over to the arena for Byng skating races in the winter. In the fall, the Stayner Fair would be set up beside the arena. The kids could see all rides being set-up and running while standing behind the fence. Every year the students would get a half day off school to go to the fair. Just like we do today, we get a half day off to go to the Great Northern Exhibition.

Many thanks goes out to Mrs. McInnis for sharing this awesome story.
